

NIKE Sales Performance Dashboard Report

This report presents a comprehensive analysis of Nike India sales performance across 6 cities, 5 product lines, and 2 sales channels from July 2023 to December 2025. The analysis is based on 1,804 cleaned transaction records.

Report Date	March 2026	Prepared By	Malehu Johanna Segoapa
Data Source	Nike_Sales_Clean.xlsx	Programme	Data Analytics
Period	Jul 2023 – Dec 2025	Tool	Power BI Desktop + Python
Records	1,804 transactions	Regions	6 Indian Cities

EXECUTIVE SUMMARY — KEY METRICS

622,074	2,483,123	1,804	399.2%
TOTAL REVENUE	TOTAL PROFIT	TOTAL ORDERS	PROFIT MARGIN
1,528	345	Dec 2024	51.9%
UNITS SOLD	AVG ORDER VALUE	BEST MONTH	ONLINE SHARE

1. REGIONAL PERFORMANCE

Revenue was analysed across 6 major Indian cities. Kolkata leads all regions despite not being the largest metro, suggesting strong local demand and distribution.

Rank	Region	Revenue (₹)	Share %	Performance
1	Kolkata	134,520	21.6%	■■■■■■■■■■ TOP
2	Hyderabad	117,262	18.8%	■■■■■■■■■■
3	Bangalore	101,590	16.3%	■■■■■■■■■■
4	Delhi	97,024	15.6%	■■■■■■■■■■
5	Mumbai	86,680	13.9%	■■■■■■■■■■
6	Pune	84,998	13.7%	■■■■■■■■■■

- Kolkata generates **21.6%** of total revenue — significantly outperforming Mumbai (13.9%) and Delhi (15.6%)
- All 6 regions show healthy distribution — no single city dominates, reducing geographic risk
- Recommendation: Investigate Kolkata success factors and replicate in underperforming cities

2. PRODUCT LINE ANALYSIS

Five product categories were analysed. Training and Basketball together account for over half of all revenue, while Running significantly underperforms relative to its market potential.

Product Line	Revenue (■)	Share %	Orders	Assessment
Training	166,644	26.8%	~360	STRONG
Basketball	162,543	26.1%	~350	STRONG
Soccer	138,391	22.3%	~300	GOOD
Lifestyle	102,753	16.5%	~220	MODERATE
Running	51,743	8.3%	~110	WEAK — OPPORTUNITY

- Training + Basketball = **52.9%** of total revenue — core categories are performing well
- Running at only **8.3%** represents a significant growth opportunity with targeted campaigns
- Lifestyle at 16.5% has potential to grow with trend-driven marketing to younger demographics

3. TOP PRODUCTS BY REVENUE

Rank	Product Name	Revenue (■)	Total Profit (■)	Units Sold
01	LeBron 20	63,676	149,682	84
02	Flex Trainer	57,715	126,272	87
03	Zoom Freak	51,501	136,016	95
04	ZoomX Invincible	40,811	123,149	78
05	Air Force 1	40,288	115,245	74
06	Phantom GT	38,446	134,538	86
07	Air Jordan	37,944	115,760	73
08	Premier III	37,564	120,549	90
09	SuperRep Go	35,737	144,248	92
10	Metcon 7	32,380	101,924	66

- LeBron 20 is the standout revenue generator at **63,676** — 10.2% of total revenue alone
- SuperRep Go generates the highest profit (144,248) relative to its revenue — best margin product

4. SALES CHANNEL ANALYSIS

Nike India operates through two channels: Online and Retail. The channel split is nearly equal, reflecting a balanced omni-channel strategy.

Channel	Revenue (■)	Share %	Profit (■)	Orders
Online	322,708	51.9%	1,224,666	905
Retail	299,366	48.1%	1,258,458	899
TOTAL	622,074	100%	2,483,123	1,804

- Online (51.9%) narrowly leads Retail (48.1%) in revenue — a healthy digital-first tilt
- Retail profit (1,258,458) is actually higher than Online profit (1,224,666) despite lower revenue
- Recommendation: Invest in digital marketing to grow Online share while maintaining Retail presence

5. GENDER & DEMOGRAPHICS

Units sold were analysed by gender category. The distribution is remarkably balanced across Men, Kids, and Women — demonstrating Nike's broad market appeal.

Gender	Units Sold	Share %	Insight
Men	520	34.0%	Slightly leading — core demographic
Kids	507	33.2%	Strong — youth market well captured
Women	501	32.8%	Near-equal — good gender parity
TOTAL	1,528	100%	

- Only **1.2% difference** between highest (Men 34.0%) and lowest (Women 32.8%) — exceptional balance
- Strong Kids segment (33.2%) suggests successful youth marketing and school sports partnerships

6. PROFIT HEALTH ANALYSIS

Order-level profitability was assessed to identify the ratio of profitable vs loss-making transactions across both sales channels.

Metric	Online	Retail	Total
Total Orders	905	899	1,804
Profitable Orders	688	697	1,385
Loss Orders	217	202	419
Profitable Rate	76.0%	77.5%	76.8%

- **76.8%** of all orders are profitable — a strong but improvable ratio
- Online (76.0%) and Retail (77.5%) profitable rates are nearly identical — consistent performance
- 419 loss orders (217 Online, 202 Retail) need investigation — likely caused by excessive discounting
- Recommendation: Review discount policy across both channels to reduce loss order rate

7. MONTHLY REVENUE TREND

Revenue was tracked monthly from July 2023 to December 2025 to identify seasonal patterns and growth trends.

Month	Revenue (■)	Rank	Notes
December 2024	66,961	#1 Best Month	Year-end peak — festive season
March 2025	59,721	#2	Strong Q1 2025
April 2025	53,568	#3	Sustained momentum
July 2023	Low	Start	Business beginning
2025 overall	Growing	Trend Up	Consistent growth trajectory

- December 2024 peak at **66,961** — plan for festive season inventory in advance
- 2025 Q1 shows strong sustained performance — growth trend is upward
- Recommendation: Increase stock and marketing spend in November ahead of December peak

8. STRATEGIC RECOMMENDATIONS

#	Recommendation	Priority	Expected Impact
1	Investigate Kolkata success and replicate in Mumbai/Pune	HIGH	Revenue +10-15%
2	Launch targeted Running category campaign	HIGH	Category +20%
3	Review discount policy to reduce 419 orders (217 Online	HIGH	Profit +8%
4	Plan November/December inventory surge early	MEDIUM	Revenue +12%
5	Expand Kids product range — strong 33.2% unit share	MEDIUM	Units +10%
6	Grow Women's segment with targeted social campaigns	MEDIUM	Units +8%
7	Invest in Online channel digital marketing ROI	LOW	Share +5%

9. DATA QUALITY & CLEANING SUMMARY

The raw dataset contained significant quality issues. All issues were resolved using Python (Pandas) before importing into Power BI.

Issue	Raw Count	Fix Applied	Rows Affected
-------	-----------	-------------	---------------

Duplicate Order IDs	114	Removed duplicates, kept first	114 removed
Mixed date formats	3 formats	Standardized to YYYY-MM-DD	All dates
Unparseable dates	616	Rows removed	616 removed
Region typos	497	Mapped to correct names	497 fixed
Missing Size values	510	Filled with "Unknown"	510 fixed
Missing Units_Sold	1,235	Filled with 0	1,235 fixed
Negative Units_Sold	205	Corrected to 0	205 fixed
Missing MRP	1,254	Filled with 0	1,254 fixed
Missing Discount values	1,668	Filled with 0	1,668 fixed
Discounts over 100%	180	Capped at 1.0 (100%)	180 fixed
Negative Revenue	53	Corrected to 0	53 fixed

Final Result: 1,804 clean rows | 17 columns | 0 nulls in numeric columns | Saved as Excel for correct Power BI data type detection.
